CONTENTS OF VOLUME 4

Vol. 4, No. 1

D. A. Bittker	1	Mathematical description of complex chemical kinetics and application to CFD modeling codes
J. J. Korte and **A. H. Auslender**	13	Optimization of contoured hypersonic scramjet inlets with a least-squares parabolized Navier–Stokes procedure
W. Shyy, S. Thakur and **H. S. Udaykumar**	27	A high accuracy sequential solver for simulation and active control of a longitudinal combustion instability
J. A. Zukas	43	Some common problems in the numerical modeling of impact phenomena
T. Yamada	59	A rezoning procedure for finite element analysis of incompressible hyperelasticity
B. Fu and **P. Hajela**	69	Minimizing distortion in truss structures—a Hopfield network solution
B. Kumar and **J. S. Gero**	75	Designing for conflicting constraints
I. Applegarth and **P. Bettess**	87	Implementation of the subspace iteration method for eigenproblems on a symmetric multiprocessor system
I. Applegarth, C. Barbier and **P. Bettess**	99	A parallel equation solver for unsymmetric systems of linear equations
		Book Reviews
R. K. Livesley	117	Matrix Computation, 2nd Edn, by A. Jennings and J. J. McKeown
	i	Calendar of Events
	iii	Announcement

Vol. 4, Nos 2–3

SPECIAL ISSUE: CIVIL–COMP ARTIFICIAL INTELLIGENCE

	119	Editorial
P. Hajela, B. Fu and **L. Berke**	121	ART networks in automated conceptual design of structural systems
O. Moselhi and **T. Hegazy**	135	Markup estimation using neural network methodology

R. Fruchter, K. H. Law and **Y. Iwasaki**	147	QStruc: an approach for qualitative structural analysis
L. Manevitz, D. Givoli and **M. Margi**	159	Heuristic finite element node numbering
R. K. Rajan, R. V. Nambiar, K. L. Lawrence and **T. J. Lawley**	169	A description of an expert system for finite element modeling and analysis
M. A. Fischer	179	Automating constructibility reasoning with a geometrical and topological project model
A. N. Baldwin and **S. A. Oteifa**	193	The development of knowledge-based systems for contractors' resource-based estimating: a role for protocol analysis
S. Rajeev, S. Suresh and **C. S. Krishnamoorthy**	201	A criticism-based model for cooperative problem solving
G. H. Arafat, B. Goodman and **T. Arciszewski**	211	RAMZES: a knowledge-based system for structural concepts evaluation
A. Borkowski, N. Fleischmann and **K.-U. Bletzinger**	223	Supporting conceptual decisions in structural design
B. T. Philbey, C. Miles and **J. C. Miles**	235	User-interface design for a conceptual bridge design expert system
V. K. Koumousis	243	Three-hinge arch and asteroid trusses programmed in logic
A. Omari and **G. G. Roy**	253	A representational scheme for design code information in an expert systems approach to building design
S. Alkass, M. Mazerolle and **F. Harris**	271	An integrated system to minimize the cost of analyzing construction claims
J. H. M. Tah, A. Thorpe and **R. McCaffer**	281	Contractor project risks contingency allocation using linguistic approximation
T. S. Sakthivel and **V. Kalyanaraman**	295	Standards processing in an integrated engineering system
T.-J. Lee and **C.-K. Soh**	307	An integrated approach to generate construction schedules
D. G. Toll, N. Vaptismas and **M. Moula**	317	A methodology for comparing soils for use in knowledge-based systems
K. Ahmad and **S. Griffin**	325	Intelligent assistants and engineering decision support: management of water resources
J. Wu and **B. G. Heydecker**	337	A knowledge-based system for road accident remedial work

Vol. 4, Nos 4–6

SPECIAL ISSUE: PARALLEL COMPUTATIONAL METHODS FOR LARGE-SCALE STRUCTURAL ANALYSIS AND DESIGN

iii List of Contents

v Preface

Large-scale Static Analysis

O. O. Storaasli, D. T. Nguyen, M. A. Baddourah and **J. Qin** 349 Computational mechanics analysis tools for parallel–vector supercomputers

A. C. Damhaug, K. M. Mathisen and **K. M. Okstad** 355 The use of sparse matrix methods in finite-element codes for structural mechanics applications

M. A. Baddourah, O. O. Storaasli and **S. W. Bostic** 363 Linear static structural and vibration analysis on high-performance computers

J. Liu and **G. Wu** 373 An efficient finite element solution method for analysing large-scale symmetric structures

J. Qin, T. K. Agarwal, O. O. Storaasli, D. T. Nguyen and **M. A. Baddourah** 381 Parallel–vector out-of-core equation solver for computational mechanics

V. Gupta, J. Newell, O. Storaasli, M. Baddourah and **S. Bostic** 387 Space station static and dynamic analyses using parallel methods

L. Komzsik and **K.-N. Chiang** 399 The effect of a Lagrange multiplier approach in MSC/NASTRAN on large-scale parallel applications

E. Poole, J. Bauer, T. Stratton and **T. Weidner** 405 Large-scale nonlinear structural analysis simulation on CRAY parallel/vector supercomputers

Dynamic, Transient and Thermal Analysis

R. S. Harichandran and **B. Ye** 415 A method of deriving parallel algorithms for direct integration in structural dynamics

R. C. Shieh 421 Massively parallel computational methods for finite element analysis of transient structural responses

A. J. Kurdila, R. Menon and **T. W. Strganac** 435 Constraint violation in concurrent range space methods for transient dynamic analysis

R. R. Namburu 445 Enthalpy-based explicit finite element data parallel formulations for thermal analysis of structures

Domain Decomposition (Substructuring)

C. Farhat 453 Fast structural design and analysis via hybrid domain decomposition on massively parallel processors

A. I. Khan and **B. H. V. Topping** 473 Subdomain generation for parallel finite element analysis

P. S. Su and **R. E. Fulton** 489 A parallel domain decomposition finite element method for massively parallel computers

G. Yagawa and **R. Shioya** 495 Parallel finite elements on a massively parallel computer with domain decomposition

J.-C. Luo 505 Parallel algorithms for the solution of a sparse system

Nonlinear and Numerical Methods

D. Y. Xue and **C. Mei** 513 Nonlinear vector eigen-solver and parallel reassembly processing for structural nonlinear vibration

S.-H. Hsieh and **J. F. Abel** 521 Use of networked workstations for parallel nonlinear structural dynamic simulations of rotating bladed-disk assemblies

C. J. Ribbens, G. G. Pitts and **L. T. Watson** 531 Parallel ELLPACK for shared memory multi-processors

541 Calendar of Events
